

CLIENT VeriSign

PROJECT Direct mail

OBJECTIVE

Generate leads from CXO-level executives for regulatory compliance solutions.

STRATEGY

Send high-impact dimensional package with offer for a consultation and free executive chess set.

PROJECT OVERVIEW

A growing regulatory landscape has made it more difficult for IT executives to manage security, privacy, access control, and archiving of critical data. That compounds the difficulty of managing a complex IT infrastructure while complying with regulations such as Sarbanes-Oxley, Gramm-Leach-Bliley, and HIPAA.

VeriSign offers a set of solutions for security and compliance that includes technology, consulting, and complete managed services.

This dimensional direct mail package uses chess as a concept to emphasize the strategic aspects of managing priorities, balancing access against privacy standards, and controlling cost and complexity.

Inside the tin box is a chess piece, a letter, a series of cards outlining various VeriSign solutions, and a response card. The offer is for an initial consultation plus a free executive glass chess set.

.....
See below for detailed views of all elements in this package.

Tin box

Introductory card

The winning strategy for meeting complex compliance challenges.

Make the right strategic moves.

Compliance can't be won just once. You have to meet this challenge every single day.

Sarbanes-Oxley, HIPAA, Gramm-Leach-Bliley and other standards have created a regulatory landscape of constant change. Effective risk assessment, process design, and infrastructure management are essential to keep spiraling costs under control.

As a trusted advisor and stable partner, only VeriSign offers access to a vast global intelligence network, credentialed experts, and technology that ends compliance complexity. Our comprehensive services include:

- ✓ **Global Security Consulting:** to help you assess your risks and develop an effective mitigation strategy
- ✓ **Managed Security:** a complete outsourced solution to manage your infrastructure at specified service levels with predictable costs
- ✓ **Messaging Security and Compliance:** to secure email systems from viruses, block spam, and meet strict requirements for message archiving and retention
- ✓ **Unified Authentication:** a powerful integrated platform with more options for serving remote users, while controlling access and preventing fraud

It's your move.

Call 1-000-000-0000 to meet with a VeriSign representative. We'll bring your complimentary Wood Expressions® Black Glass Chess Set along with a copy of our latest white paper on enterprise security compliance.

GLOBAL SECURITY CONSULTING SERVICES

Global Security Consulting Services

International champions
of enterprise compliance.

GLOBAL SECURITY CONSULTING SERVICES

**Credentialed experts help you assess risk
and respond to serious global threats.**

With one of the largest concentrations of certified experts in the industry, VeriSign helps clients navigate the complex regulatory landscape of enterprise information security.

Every day we monitor global security patterns and correlate this intelligence to defend our customers against attacks.

VeriSign® Global Security Consulting Services professionals can advise you and collaborate with your team to develop and deploy more effective compliance solutions.

By indentifying vulnerabilities, streamlining auditing, and documenting activities, you can rest assured that you're always adhering to the latest best practices.

Whether you need new financial systems to meet SOX requirements, protect medical information per HIPAA, or secure credit card processing under PCI guidelines, call on VeriSign for expertise and enterprise technologies that secure your data and reduce risk.

Meet with VeriSign. Call 000-000-0000
to discover how to take the cost and complexity out of compliance.

Managed Security card

MANAGED SECURITY SERVICES

Managed Security Services

The right play to support your security infrastructure.

MANAGED SECURITY SERVICES

Trust our global team to manage your security around the clock.

As compliance grows more complex, security management costs soar. Plus, maintaining a security infrastructure becomes a distraction – preventing your team from working on other strategic initiatives.

So how do you reduce your risk profile while continuing to meet business needs?

Many IT executives turn to VeriSign. Our global network of certified experts provides a complete outsourced solution to meet your specific security needs.

With VeriSign® Managed Security Services, you benefit from around-the-clock protection, plus the assurance of full compliance with SOX, HIPAA, GLBA, NERC, and PCI – all at a predictable cost.

We monitor all of your critical logs, provide intrusion detection and prevention, manage firewalls, and alert you whenever events require your immediate attention.

With VeriSign's help, you can reduce compliance complexity and manage your risk more effectively.

Meet with VeriSign. Call 000-000-0000 to learn how to take the cost and complexity out of compliance.

Messaging Security card

GLOBAL SECURITY CONSULTING SERVICES

Messaging Security and Compliance Services

Secure email storage across the board.

MESSAGING SECURITY AND COMPLIANCE SERVICES

Make sure email stays confidential and secure.

The Securities and Exchange Commission, National Association of Securities Dealers, U.S. Department of Health and Human Services, and other regulatory agencies impose strict requirements for documenting and retaining email.

VeriSign® Messaging Security and Compliance Services protect your organization's critical email assets through a full suite of services that include:

- ✓ VeriSign® Email Security Service including superior anti-spam, anti-virus, and content filtering resources
- ✓ VeriSign® Messaging Archiving Service with extensive indexing to simplify access and respond to legal requests without additional storage, software, or hardware
- ✓ VeriSign® Message Continuity Service for always-on 24/7 access to message content and automated disaster recovery

With VeriSign Messaging Security and Compliance Services you can keep all vital email services running smoothly, communicate with confidence, and ensure that private information stays that way.

Meet with VeriSign. Call 000-000-0000 to learn how to take the cost and complexity out of compliance.

Unified Authentication card

UNIFIED AUTHENTICATION

Unified Authentication Services

Allow access while
maintaining total control.

UNIFIED AUTHENTICATION SERVICES

**Strong access control to secure IT assets
and prevent unauthorized disclosure.**

There's constant pressure for you to offer more remote access, but regulatory standards such as Sarbanes-Oxley, HIPAA, GLBA, and PCI all call for strong authentication and encryption to prevent fraud and protect identities.

With years of regulatory compliance experience and a strong track record of enabling \$100 million in Internet payments every day, VeriSign offers an exceptional suite of solutions for granting remote access with the assurance of full compliance.

VeriSign® Unified Authentication Services gives you complete control over access privileges for customers, suppliers, and partners. This single integrated platform is easily deployed and supports the use of both one-time passwords and PKI credentials.

Now you can secure confidential data, prevent identity theft, and get full value from your security infrastructure.

Meet with VeriSign. Call 000-000-0000

Dear John Sample:

Knowing the right moves for staying compliant doesn't come naturally. More audits, more assessments, and more regulatory standards, such as SOX, HIPAA, PCI, and many others can turn your infrastructure into a cumbersome burden that's unwieldy, awkward, and too expensive to maintain.

But there's no need for you and your team to deal with these complex issues alone. As the world's leading provider of enterprise security services, VeriSign can help you design and drive a strategy that reduces cost and takes the complexity out of compliance.

Thanks to a vast global intelligence network, a complete suite of intelligent infrastructure services, and a vendor-neutral approach to technology, you can rely on our vast global intelligence network and our well-established reputation for stability and trust.

Please spend a few minutes with the enclosed cards to learn more about our services and resources that include:

- ✓ **Global Security Consulting** to help you assess vulnerabilities, manage risk, and assure compliance with the latest security best practices
- ✓ **Managed Security** for an outsourced solution to maintaining compliance that maximizes your existing technology investment
- ✓ **Messaging Security and Compliance Services** to simplify email archiving, assure business continuity, eliminate spam, and prevent viruses
- ✓ **Unified Authentication** that provides one single integrated platform to control access to data and prevent fraud

Your next move? Consult with a VeriSign representative on new strategies to improve compliance while controlling cost and complexity. **Call 1-000-000-0000 to make your appointment.** And to thank you for your time, we'll bring along your free executive chess set.

Sincerely,
